

PROFESSIONAL DEVELOPMENT SESSION TAYLORS HILL

CREATING A POSITIVE PARTNERSHIP BETWEEN PARENTS AND PROFESSIONALS TO SUCCESSFULLY TOILET TRAIN CHILDREN

Toilet Training Educators (TTE) promote toilet training as a normal developmental stage. We recognize that independent toilet usage is a skill development process like any other. It is developed through the normal learning cycle – watching and modelling, curiosity and experimentation, training and practice, and mastery. All information sessions and resources are underpinned by this positive message.

OUR SESSION INCLUDES:

- Lessons from the past - History and Research
- Toilet Training is skill development - Nappies to Undies is a skill development process that begins at birth.
- Children will copy, be curious, try, practice and master
- Every child will follow the same process however how long they spend in the final two stages will depend upon the first two stages.
- Partnership approaches work best
- Troubleshooting - toilet training issues and continence problems
- Preparing for night time and unpacking bed wetting

Please note that there will be an evening parent information session at 7.00pm

All professional development sessions are delivered by Anne Ferrie. Anne is a practicing maternal and child health nurse with more than 25 years experience. Anne is also a registered nurse, midwife, continence and bedwetting specialist, committed to positive evidenced based practice.
